

PRESS RELEASE 2015

MANHATTAN: the kitchen according to GRAFF

Home is like an oasis where you can feel free and enjoy intimacy and well-being. The kitchen area, in particular, is the space where time management, customization of solutions and furniture arrangements become essential.

With the Manhattan faucet, the kitchen becomes a pleasant environment where to spend valuable time, even outside of meal times, is natural

Inspired by the city skyline, the Manhattan single-hole faucet with swivel spout provides, in a minimalist design, excellent functionality. Rigorous lines and simple shapes melt together, creating an elegant and unique mix for a contemporary or transitional kitchen.

Manufactured in solid brass with a minimal level of nickel and lead, to guarantee its long life – GRAFF's warranty is five years - the faucet has been developed in compliance with all drinking water regulations and the most restrictive criteria required for the protection of health and the environment.

GRAFF's production system is based on an innovative concept of Lean Manufacturing Management, which aims to eliminate excess consumption of time, energy and materials, so that each process achieves substantial efficiency standards.

Even in the casting process, and in the finishing and galvanic treatments, GRAFF uses a zero discharge system that recycles 100 % of brass and paper. In line with the strong commitment to environmental sustainability, GRAFF is among some of the first companies in the world to have publicly expressed willingness to actually eliminate its impact on the environment in the near future.

Manhattan is available in the following finishes: Polished Chrome, Black/Polished Chrome, White/Polished Chrome, Steelnox® Satin Nickel.
